

Altos BrainSphere™ T15 F6

Altos BrainSphere™ T15 F6 is ideal for small to medium-sized businesses, light-weight applications, or simple websites, offering an affordable solution. Its low power consumption and easy management make it an ideal choice for budget-conscious or entry-level users, meeting basic computing needs.

Powerful performance

With AMD EPYC™ 4004 Processor, the Altos T15 F6 represents an architectural turning point for professional high-end compute needs. The all-new architecture optimizes CPU performance, allowing entry servers, secure cloud services, and edge devices/appliances to work at their best with up to 16 cores.

Flexible expansions

The Altos T15 F6 combines PCIe Gen5 expansion slot, PCIe Gen5 M.2 NVMe SSD slot, and support for up to four DIMM DDR5 ECC UDIMMs and four 3.5" SATA drive bays with RAID 0,1 or 10 to provide users with enhanced flexibility.

High performance and environmental friendliness

The Altos T15 F6 bundle with 80 PLUS-certified power supplies ensure efficient conversion of electrical energy, reducing waste and enhancing system performance. Energy-saving, eco-friendly, maintaining stable power output, they are suitable for power-efficient servers.
